

**Securypcto**

Monetizing anonymous content distribution

# WHAT IS SECURYPPTO ?

Securyppto is a Zerocoin, Masternode based blockchain project focused on anonymous storage & transferring of encrypted data.

- Monetizing anonymous content distribution
- Transfer or storing of untraceable encrypted messages & files across the internet.
- Linking to open source hardware wallet for an extra security layer.

# THE PROBLEM

Privacy violation by companies & governments

Hacks and leaks are dominating lives with constant fear of your data and privacy

Lack of reliable solution for anonymous messaging or data transfer.

Lack of solid payment solutions for media creators and content distributing

Complex protocols to secure or spend many different cryptocurrencies.

No way to protect content uploader's identity or the downloader

# THE SOLUTION

Full end-to-end encryption across all platforms both hardware and software

DigiSafeGuard acts as a standalone hardware wallet and encrypter for all data.

Multi-Layered anonymous transfer of all sorts of data. From text to 4K movies

All hosted data is encrypted and thus nobody can know what they are hosting.

Disabling the link between the uploader, downloader and hosting company. Securing the identity of all parties.

Content uploader gets paid by the user in SCU while the hosting company receives a fee for hosting encrypted data

# DIGISAFEGUARD

DigiSafeGuard is a hardware which is a custom designed multi-purpose wallet with several layers of security embedded in the design which also acts as an stand-alone data encryption device

-The DigiSafeGuard is an working device, you can see it in action on the Securpto youtube channel -

# MARKET OPPORTUNITY

## CRYPTO

2000+ Crypto Currencies  
210+ Billion \$ Market Cap  
120+ Billion \$ BTC Market Cap  
20+ Billion \$ ETH Market Cap

## MEDIA

500 Million daily video downloads  
50 Million daily music downloads  
600 Million hours of streaming per day  
400 Million paying content users  
30 Billion files stored online

## COMMUNICATION

120 Billion messages sent per day  
300 Billion emails per day  
200 Billion attachments per day  
700 Billion voice communication per day

# MARKET ANALYSIS

As Securypto is a wide project, it will disrupt many services like;

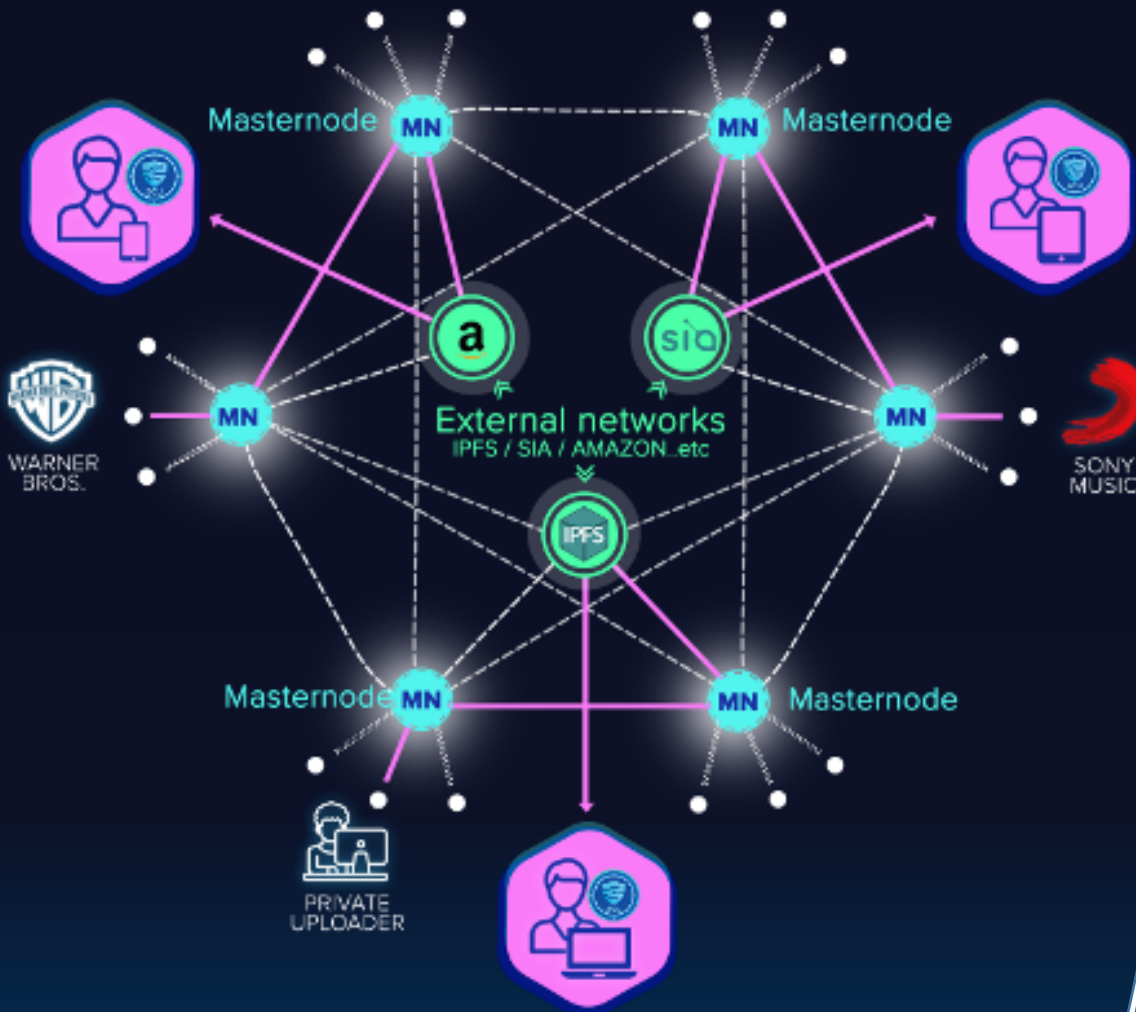

This trend will also continue with the DSG replacing other Hardware Wallets. However Securypto is in most cases not competing but acts as a additional layer giving different features and creating new use-cases based on anonymity and monetization of encrypted content

Another example would be the ongoing war between Film, Music Industry and PirateBay or other media download sites.

Securypto network can be used to transfer and store data that has been encrypted, untraceable and monetized as uploader and the host can choose to get paid by the download or per view.

# SECURCRYPTO ECOSYSTEM

## CONSUMER BENEFITS

- Fully encrypted
- Anonymous download
- Anonymous messaging
- Anonymous upload
- Low fees

## CONTENT CREATOR BENEFITS

- Get paid by the download or view
- Instant payment
- Global reach instead of local
- Anonymous upload

## HOSTING BENEFIT

- Easy setup and daily revenue
- Instant payment
- Compliant with international law

# CURRENT STATUS

- ✓ Transparent contract and investment protocol with both KYC and anonymous
- ✓ Full senior team of developers, industrial designers and marketers.
- ✓ Working prototype with software in development for mass production of DSG
- ✓ ICO Contract testing and initiating ICO Pre-Sale
- ✓ Global reach through backchannel marketing strategy in place

# TOKEN STATS

TOKEN SUPPLY  
100'000'000 SCU

Crowd Sale

Bounty

Airdrop

Treasury

Angel Investors

Developer Team

ICO Team

## UNUSED TOKENS

Will be burned after ICO

## TOKEN CONTROL

No single user will be in control of more than 1% of the tokens

## TRANSPARENCY

Publicly available transparent online bookkeeping

# SECURYPITO TEAM

Securypito is spearheaded by business orientated team members with years of experience in cryptocurrency backed with a solid knowledge on the technology behind the blockchain. This combination is key to the success of Securypito.
